Scope

This document presents the AT Command Set for SIMCom A7600 Series, including A7600XX-XXXX, A5360E, and A7670X.
1 Introduction

1.1 Purpose of the document

Based on module AT command manual, this document will introduce FTP(S) application process. Developers could understand and develop application quickly and efficiently based on this document.

1.2 Related documents

1.3 Conventions and abbreviations

In this document, the GSM engines are referred to as following term:
ME (Mobile Equipment);
MS (Mobile Station);
TA (Terminal Adapter);
DCE (Data Communication Equipment) or facsimile DCE (FAX modem, FAX board);

In application, controlling device controls the GSM engine by sending AT Command via its serial interface. The controlling device at the other end of the serial line is referred to as following term:
TE (Terminal Equipment);
DTE (Data Terminal Equipment) or plainly "the application" which is running on an embedded system;

Other Conventions:
PDP(Packet Data Protocol);
FTP(File Transfer Protocol);
SSL(Secure Sockets Layer);
TLS(Transport Layer Security);
1.4 The process of Using FTP(S) AT Commands

- **Power on the module.**
- **Check the status of SIM card and reboot the module.**
- **AT+CFTPSSTART:** (PDP active and initialize FTP(S) service)
- **AT+CFTPSSTOP:** (PDP deactive and stop FTP(S) service)
- **AT+CFTPSLOGIN:** (Login to a FTP(S) server)
- **AT+CFTPSLOGOUT:** (Logout a FTP(S) server)
- **AT+CFTPSLIST:** (List the items in the directory on FTP(S) server)
- **AT+CFTPSMKD:** (Create a new directory on FTP(S) server)
- **AT+CFTPSRMD:** (Delete a directory on FTP(S) server)
- **AT+CFTPSCWD:** (Change the current directory on FTP(S) server)
- **AT+CFTPSPWD:** (Get the current directory on FTP(S) server)
- **AT+CFTPSPUTFILE:** (Upload a file from module to FTP(S) server)
- **AT+CFTPSPUT:** (Put a file to FTP(S) server through serial port)
- **AT+CFTPSTYPE:** (Set the transfer type on FTP(S) server)
- **AT+CFTPSSIZE:** (Get the file size on FTP(S) server)
- **AT+CFTPSSLCFG:** (Set the SSL context id for FTPS session)

**FTP or FTPS?**

FTP(S) Operation:
For details, please refer to A7600 Series_AT Command Manual and A7600 Series_FTP(S)_Application Note.
1.5 Error Handling

1.5.1 Executing FTP(S) AT Commands Fails

When executing FTP(S) AT commands, if ERROR response is received from the module, please check whether the U(SIM) card is inserted and whether it is +CPIN: READY returned when executing AT+CPIN?.

1.5.2 PDP Activation Fails

If it is failed to activate a PDP context with AT+CGACT command, please check the following configurations:
1. Query the PS domain status by AT+CGREG? and make sure the PS domain has been registered.
2. Query the PDP context parameters by AT+CGDCONT? and make sure the APN of the specified PDP context has been set.
3. Make sure the specified PDP context ID is neither used by PPP nor activated by AT+CGACT command.

If all above configurations are correct, but activating the PDP context by AT+CGACT command still fails, please reboot the module to resolve this issue. After rebooting the module, please check the configurations mentioned above for at least.

1.5.3 Error Response of FTP(S) Server

When the CFTPSXXX: <errorcode> is not 0, it indicates an error code replied from FTP(S) server. For example, if <errorcode> is 1, ssl configure may be wrong. If <errorcode> is 17, the file or directory may not exist. For more details, please refer to A7600 Series_AT Command Manual_V1.01.08.
## AT Commands for FTP(S)

<table>
<thead>
<tr>
<th>Command</th>
<th>Description</th>

3 FTP(S) Examples

Before all FTP(S) related operations, we should ensure the following:

Ensure network is available:

```
AT+CSQ
+CSQ: 23,0
OK

AT+CREG?
+CREG: 0,1
OK

AT+CGREG?
+CGREG: 0,1
OK

AT+CPSI?
+CPSI:
LTE,Online,460-00,0x333C,39589680,308,EUT
RAN-BAND3,1350,5,0,0,54,0,22
OK

//In WCDMA/3G, you need to continue to execute the following instructions

AT+CGDCONT=cid,"ip","APN"
OK

AT+CGACT=1,cid
OK

AT+CGACT?
+CGACT: 1,1
OK
```

3.1 FTP Function
3.1.1 Download a file from FTP server to module/Upload a file to FTP server from module

///Example of FTP upload/download

AT+CFTPSSTART //Start FTP service
